

ENERGY STAR Qualified Appliance Product List Updates – June 2004

This document provides a list of appliances that were either added to the qualified product list in the previous month, deactivated from the qualified product list in the last month, or had their product specifications changed. Due to the new dishwasher test procedure, many dishwashers now have different specifications. Please be aware that the same model may exist with two different EnergyGuide values depending on when it was manufactured. In the last month, we also reconciled any differences that existed between our databases and subsequently several products may have changed on either the product search function or the spreadsheet list.

Deactivated products will remain on the qualified list in red for the next year. For any questions about this list, please contact Bill McNary (bmcnary@drintl.com) or James Siegel (jsiegel@drintl.com) at 301-588-9387.

ENERGY STAR Qualified Residential Clothes Washers

New:

General Electric S5200EWW
