ENERGY STAR®, a U.S. Environmental Protection Agency program, helps us all save money and protect our environment through energy-efficient products and practices. For more information, visit www.energystar.gov.

BENEFITS OF ENERGY STAR® CERTIFIED COMMERCIAL FOOD SERVICE (CFS) EQUIPMENT

Commercial Steam Cookers

Commercial steam cookers that have earned the ENERGY STAR are approximately **60 percent more energy efficient** than standard models. To meet the strict efficiency requirements developed by the U.S. Environmental Protection Agency's ENERGY STAR program, manufacturers use high quality components and employ innovative designs.

Eligible Products: Gas and electric steam cookers. Models may include countertop models, wall-mounted models and floor-models mounted on a stand, pedestal or cabinet-style base. Steamers must be 3-pan or larger to qualify for ENERGY STAR.

Ineligible Products: Hybrid/combination products and pressure steamers.

EXAMPLES OF TECHNICAL APPROACHES TO REDUCE ENERGY CONSUMPTION

- Connectionless design
- Closed-system design
- Improved insulation
- Improved gaskets

EXAMPLE OF ADDITIONAL BENEFITS

- 90% percent reduction in water consumption (connectionless models)

ESTIMATED ENERGY AND COST SAVINGS FOR ENERGY STAR CERTIFIED MODELS

Gas Models

\$1,100
Annual Savings

Save 130
MBtu/year

\$11,900
Lifetime Savings*

Electric Models

\$1,100
Annual Savings

Save 11,500
kWh/year

\$11,100
Lifetime Savings*

In addition, ENERGY STAR qualified steam cookers can save 162,000 gallons of water, equating to additional savings of more than \$1,100 annually.

* Based on 12-year life and 4 percent discount rate. Actual savings will vary depending on use.

Incentives available for ENERGY STAR certified steam cookers range from:

\$70–\$3,200

The eight ENERGY STAR CFS equipment categories include: griddles, ovens, hot food holding cabinets, fryers, steamers, dishwashers, ice machines, and refrigerators and freezers.

ADDITIONAL ENERGY STAR HIGHLIGHTS

- Outfitting an entire kitchen with a suite of ENERGY STAR certified CFS equipment could save operators about 340 MBtu/year, or the equivalent of more than \$4,500/year. These energy savings would prevent about 34,000 pounds of greenhouse gas emissions annually.
- Models that have earned the ENERGY STAR meet strict guidelines set by the U.S. Environmental Protection Agency. Their performance is certified by third-parties based on testing performed in an EPA-recognized laboratory.
- ENERGY STAR qualified equipment is often a baseline for achieving credits from commercial kitchen and restaurant certification and rating programs.
