Standards Review Report

Standard Name Reviewed		Energy Star-Draft V1.0 Tier 2
s/n	where	what issue
1		Less requirements for blade server, the efficiency requirements of blade server is not clear now.
2	Page 23	It's hard to calculate the FA, easy to get error data.

suggestion	Remark
Define a different level for blade server + rack	Huawei can support blade server requirements file, if Huawei to be invited to do it.
Suggest to give an example on how to calculate the parameter FA
